FSI Decision Support System (DSS)

- **Background**

The Group of Ministers (GoM) constituted by the Cabinet Secretariat vide OM No. 121/4/2020-Cab dtd. 03.02.2011 to consider the environmental and development issues related to Coal Mining and other development projects in its 5th Meeting under the Chairmanship of the then Hon'ble Finance Minister on 20th Sep 2011 suggested that identified pristine forest areas where any mining activity would lead to irreversible damage to the forest should be barred from any non forest activities. The GoM further suggested that all such forest which can never be regenerated to the desired quality should be protected. A committee of experts was thus constituted to identify such forests.

Dated: 30th March, 2012

ORDER

Whereas, a Group of Ministers (GoM) constituted by the Cabinet Secretariat vide their O.M. No. 121/4/3/2010-Cab. dated 03.02.2011 to consider the environmental and developmental issues relating to coal mining and other development projects, in its fifth meeting held under the Chairmanship of the Hon'ble Finance Minister on 20th September 2011 *inter-alia* suggested that identified pristine forest areas where any mining activity would lead to irreversible damage to the forests should be barred from any kind of non-forest activity;

2. **And whereas**, the GoM further suggested that all such forests which can never be regenerated to the desired quality should be protected;

3. **And whereas**, the GoM further suggested that a committee comprising experts in the field can be constituted to identify such forests;

4. **And whereas**, this Ministry after examination of the matter decided that for identification of pristine forest areas where any mining activity would lead to irreversible damage, and such other forest areas which needs to be conserved and protected to meet the larger objective of the long term conservation of forests and wildlife resources in the country, in an objective and unbiased manner, it may constitute two Committees. **First** to formulate objective parameters for identification of such areas, and **second** to actually identify and prepare geo-referenced maps of the areas that meet these parameters;

5. **Now therefore**, it is hereby decided that a committee, with the following composition, is constituted with immediate effect to formulate objective parameters for identification of inviolate forest areas:

1. Secretary, Environment & Forests, Govt. of India	Chairman
2. Director General of Forests & Special Secretary to the Government of India	Member
3. Addl. Director General of Forests (Wildlife), Ministry of Environment & Forests, Govt. of India	Member
4. Addl. Director General of Forests (Forest Conservation), Ministry of Environment & Forests, Govt. of India	Member
5. Chairperson, National Bio-diversity Authority, Chennai	Member

6. Director General, Forest Survey of India, Dehradun	Member
7. Director, Wildlife Institute of India, Dehradun	Member
8. Member Secretray, National Tiger Conservation Authority (NTCA)	Member
9. Principal Chief Conservator of Forests, Madhya Pradesh	Member
10. Principal Chief Conservator of Forests, Tamil Nadu	Member
11. Principal Chief Conservator of Forests, Uttarakhand	Member
12. Principal Chief Conservator of Forests, Orissa	Member
13. Principal Chief Conservator of Forests, Meghalaya	Member
14. Principal Chief Conservator of Forests, Rajasthan	Member
15. Joint Secretray, Impact Assessment Division, MoEF	Member
16. Inspector General of Forests (Forest Conservation), MoEF	Member-Secretray

6. **And**, it is further decided that committee will submit its report within one month from date of its constitution.

Assistant Inspector General of Forests

1. Chairperson, National Bio-diversity Authority, Chennai.
2. Director General, Forest Survey of India, Dehradun.
3. Director, Wildlife Institute of India, Dehradun.
4. The Member Secretray, National Tiger Conservation Authority (NTCA).
5. Principal Chief Conservator of Forests, Madhya Pradesh.
6. Principal Chief Conservator of Forests, Tamilnadu.
7. Principal Chief Conservator of Forests, Uttarakhand.
8. Principal Chief Conservator of Forests, Orissa.
9. Principal Chief Conservator of Forests, Meghalaya.
10. Principal Chief Conservator of Forests, Rajasthan.
11. Sr. PPS to Secretray, Environment & Forests, MoEF.
12. Sr. PPS to DGF &SS, MoEF.
13. Sr. PPS to Addl. DGF (WL), MoEF.
14. Sr. PPS to Addl. DGF (FC), MoEF

16. PS to JS (RG), MoEF.

Broad Principles for Identification of Inviolable Areas

- The Inviolable areas are sites of significance for conservation of Bio-diversity (Flora and fauna) and Forest types that are unique and ecologically important. Keeping this in mind alongwith other parameters, the committee identified following measurable parameters for identification of Inviolable Areas:
- **Forest Type:** Around 178 forest types were found unique and therefore irreplaceable which included Tropical Wet Evergreen Forest, Myristica Swamp Forests, Reed Breaks, Desert Dunes Shrubs, etc. Based on the principle of their comparative ecological significance, extent and range, uniqueness, etc. an attempt was made to score them on scale of 1 – 100.

Broad Principles for Identification of Inviolable Areas

- **Biological Richness:** Biodiversity offers enormous economic and environmental values that are critical for human well being. Indian Institute of Remote Sensing (IIRS, Dehradun) has carried out Biodiversity Characterization for the entire country at landscape level. Prioritization of the area based on IIRS data on biodiversity has also been taken into account for scoring a site on the basis of this parameter.
- **Wildlife Value:** The country has a network of protected areas (PAN) in its forests. Based on the parameters like wetlands, breeding sites, congregation sites, etc., scoring criteria has been developed by FSI for assigning wildlife value to a site.

Broad Principles for Identification of Inviolable Areas

- **Landscape Integrity:** Integrity of Landscape is an important factor to ensure integration of various elements of habitats, thereby fulfilling the requirement of connectivity, livelihoods and contiguity among them besides lending aesthetic values.
- **Hydrological Value:** Forest play an important role in maintenance of hydrological cycle. Therefore, maintenance of forest cover in catchment areas of first order perennial streams is important for survival of these streams. With availability of information in Geo-spatial format, it is possible to carry out analysis in GIS mode.

Parameters decided by MoEF & CC for the identification of Inviolable and Not Inviolable Areas

MoEF & CC has defined two Decision Rules: **Decision Rule1 (DR-1)** and **Decision Rule2 (DR-2)**

Decision Rule-1 (Without 50% Rule)

- Any Area of Interest (AOI) which falls within or intersects Protected Area, Tiger Reserve & Wildlife Corridor and area within 1 km from its boundary will be treated as inviolable.
- Any AOI which falls within or intersects Very Dense Forest (VDF) patch having area more than 1 sq.km will be treated as inviolable.
- Any AOI which falls within or intersects Rare Forest Type will be treated as inviolable.
- Any AOI which falls within or intersects 250m buffer from the banks of important rivers, streams and wetlands (more than 10 hectares in area) will be treated as inviolable.

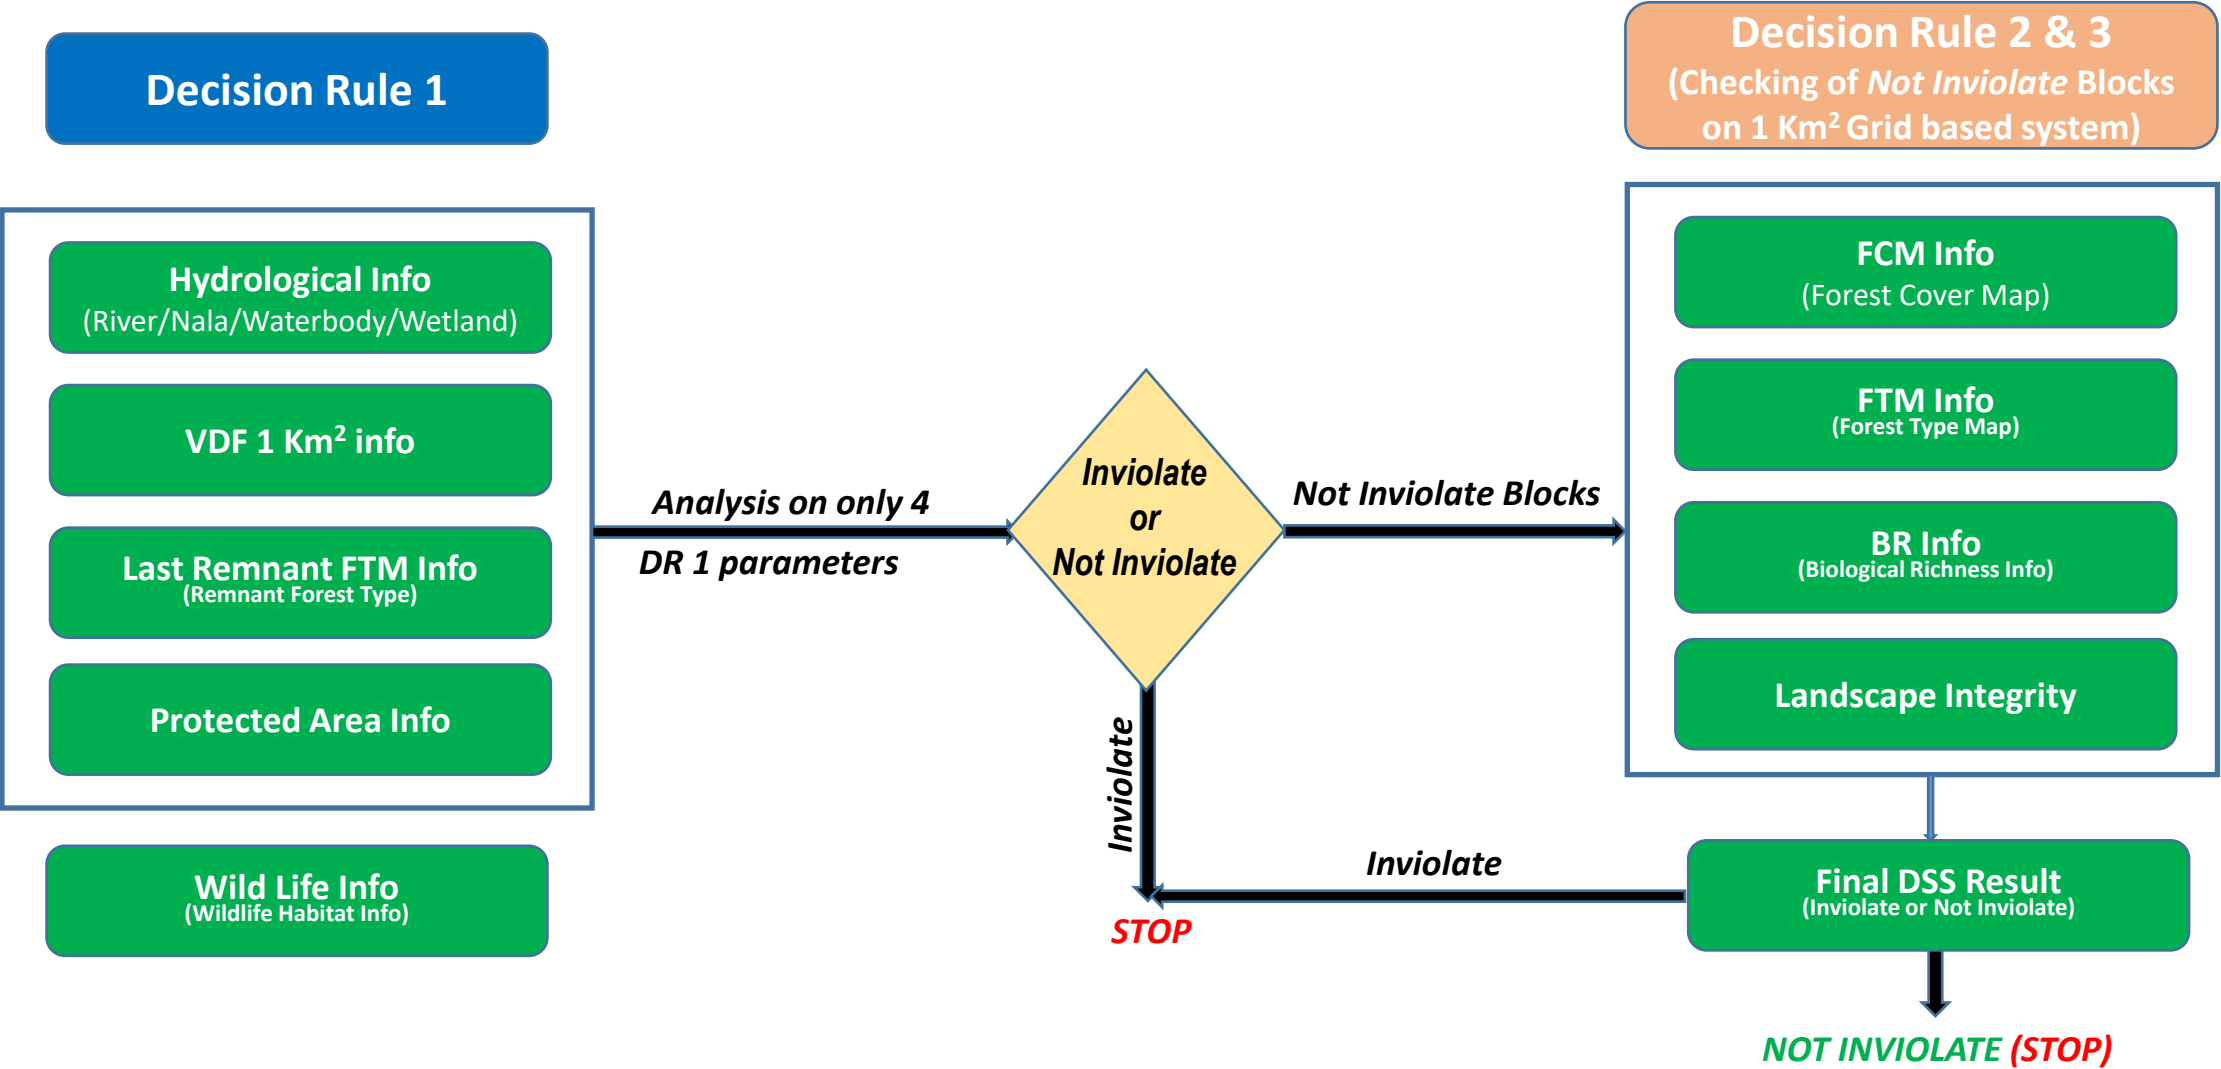

DECISION RULE–II (With 50% Rule)

- In Decision Rule 2, the analysis is based on 50% rule. It is a grid based analysis (1km x 1km).
- The basic unit for identification of Inviolable areas is a grid of size 1km x 1km.
- Grids which cover 50% or more area of the polygon are considered for analysis.
- Grids will be classified as INVIOABLE if average score exceeds 70 (out of 100) based on four parameters i.e. Forest Cover, Forest Type, Biological Richness, & Landscape Integrity.
- The area is considered inviolable if 50% or more of the total no. of grids in that area come out as INVIOABLE If not, then it is categorized as NOT INVIOABLE.

Limitations of DSS

- Forest patches having area less than 1 hectare cannot be analysed through DSS.
- Decision Rule 2 analysis will not be done for the polygon having area less than 1 sq. km.
- Underground mining work cannot be analysed.

FLOWCHART OF FSI DECISION SUPPORT SYSTEM (DSS)

Disclaimer

- The DSS Analysis is done on **Beta-version** (Trial Version) of Decision Support System (DSS) of FSI / MOEF.
- The Decision Rules for various parameters of this DSS System are controlled by FSI.
- CMPDI only runs this DSS to obtain the status of any block based on the Decision Rules inbuilt with the system.
- The database of the Decision Rules is updated by FSI from time to time and hence, the analysis results may vary.
- CMPDI does not own any responsibility for variation in the results which are based on the Decision Rules of the FSI DSS in case of any updation of the database at FSI end.

Evaluation of Coal Blocks against Environmental Considerations

- The eco-sensitive zones (ESZ) are notified for protection of National Parks (NP) and wildlife sanctuaries (WLS).
- In addition, Protected Area (PA), Tiger Reserve (TR) and Tiger Corridor are also identified to ensure protection of such areas and wildlife therein.
- For each of the ESZ, there is separate Notification issued by MoEFCC that *interalia* includes boundary co-ordinates of ESZ, floral and faunal description of the area, and list of activities that can be permitted inside ESZ.
- It also includes activities that are:
 - Prohibited
 - Regulated, and
 - Promoted
- The commercial mining is prohibited in area within ESZ/WLS/PA/TR.
- In addition, the mining activities are also prohibited within ESZ by MoEFCC's circular No. 22-43/2018-IA.III dated 8th August, 2019.

Evaluation of Coal Blocks against Environmental Considerations

- The commercial mining is also prohibited within 1 km from the boundary of NP/WLS.
- The Lemru Elephant Reserve in Chhattisgarh, though yet to be notified, is considered for ESZ evaluation on account of reservations from State Government of Chhattisgarh.
- The kml file of Tiger Reserve/Tiger Corridor, available at the website of National Tiger Conservation Authority (NTCA) has also been used. There is directive from NTCA to evaluate the projects against the Tiger Reserve/Corridor.
- The coal blocks considered under 2nd Tranche are spread in the State of:
 - Jharkhand
 - Chhattisgarh
 - Madhya Pradesh
 - Maharashtra
 - Odisha
 - Andhra Pradesh
- The distance of ESZ/ Lemru Elephant Reserve/ Protected Areas/ Tiger Reserve & Corridor from boundaries of the block has been mentioned.
